EXAMINER'S AMENDMENT AND REASON FOR ALLOWANCE

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Howard I. Sobelman on 08/07/07.

2. The application have been amended as follows:

Please replace claim 1 as follows:

1. A computer-implemented method for managing digital content for a company website on a global basis, including the steps of:
 - receiving, at a content management application, a request to create updated content for a content page within said company website, wherein said updated content comprises components;
 - creating said components according to said request; ,
 - storing each of said components within a markup language file in a database globally accessible by a reviewer, wherein said components are decoupled from said content page;
 - routing said components to said reviewer, wherein each of said components is individually routed;
 - creating an updated content page when each of said components has been authorized, wherein said updated content page does not include said components and comprises content

mapping data which includes instructions for mapping said components to said updated content page;

receiving, from a computer of a user, a request to view said updated content page;

retrieving a category tag click count for at least one of said components corresponding to said user;

analyzing said category tag click count to determine a level of interest for establishing user preferences;

retrieving said components according to said user preferences, wherein each of said components includes a category tag corresponding to said user preferences; and

positioning said retrieved components on said updated content page according to said content mapping data.

Please replace claim 14 as follows:

14. A computer-readable storage medium containing a set of instructions for a general-purpose computer comprising:

receiving, at a content management application, a request to create updated content for a content page within said company website, wherein said updated content comprises components;

creating said components according to said request;

storing each of said components within a markup language file in a database globally accessible by a reviewer, wherein said components are decoupled from said content page;

routing said components to said reviewer, wherein each of said components is individually routed;

creating an updated content page when each of said components has been authorized, wherein said updated content page does not include said components and comprises content mapping data which includes instructions for mapping said components to said updated content page;

receiving, from a computer of a user, a request to view said updated content page;

retrieving a category tag click count for at least one of said components corresponding to said user;

analyzing said category tag click count to determine a level of interest for establishing user preferences;

retrieving said components according to said user preferences, wherein each of said components includes a category tag corresponding to said user preferences; and

positioning said retrieved components on said updated content page according to said content mapping data.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1 and 14 (now renumbered as 1 and 7), the features of retrieving and analyzing a category tag click count for a component among components of an updated web page corresponding to a user who requests to view the updated web page to establish the user's preferences, wherein each component includes a category tag corresponding to said user preferences; retrieving the components based on the established user's preferences and mapping the components to the updated web page are not shown and would not have been
